ENQUIRY 1 1HI0/B4 • KEY TOPIC 2.1

Plots and Revolts at Home, 1569–1587

Historical Enquiry: How did domestic Catholic rebellion, foreign-backed assassination conspiracies, and Walsingham's intelligence apparatus lead inexorably to the execution of Mary, Queen of Scots?

SECTION 1 THE FEUDAL UPRISING: THE NORTHERN EARLS & CATHOLIC REBELLION, 1569

[1.1] In November 1569, royal messengers dashed into Whitehall bearing catastrophic news: the Catholic north had risen in armed rebellion. Led by **Charles Neville, Earl of Westmorland**, and **Thomas Percy, Earl of Northumberland**, the Catholic nobility mobilized 4,600 armed horsemen. The earls were alienated by Elizabeth's centralizing Protestant government. Under Cecil, the Crown stripped northern lords of traditional border offices, granting royal patronage to southern 'new men'. The appointment of Protestant James Pilkington as Bishop of Durham and Sussex over the Council of the North left northern magnates feeling their feudal power and ancient faith under mortal assault.

[1.2] On 14 November 1569, rebels burst into **Durham Cathedral**, tearing the English Prayer Book to shreds and celebrating Latin Mass. The rebellion was a dynastic conspiracy: the earls planned to march south, liberate **Mary, Queen of Scots** from Tutbury, and marry her to England's premier peer, Thomas Howard, Duke of Norfolk, expecting Spanish reinforcement from Alba's tercios in the Netherlands. The rebellion exposed the deep sectarian rift in English society, proving that despite ten years of the Elizabethan Settlement, Catholic loyalties remained entrenched across Yorkshire, Durham, and Northumberland.

[1.3] However, the rebellion collapsed under strategic isolation. Spanish troops never arrived, and towns like York and Newcastle closed their gates. As Sussex advanced with 14,000 royal troops, the earls disbanded at Bramham Moor and fled into Scotland. Elizabeth's retribution was merciless: Northumberland was extradited and beheaded at York, while provost marshals executed over **450 ordinary rebels** across northern villages, ensuring the lesson of Tudor sovereign vengeance was never forgotten.

PRIMARY RECORD REBEL MANIFESTO PROCLAIMED AT DURHAM CATHEDRAL 15 November 1569

Source A: Proclamation of the Earls of Northumberland and Westmorland

> *"We, Thomas Earl of Northumberland and Charles Earl of Westmorland, the Queen's true and faithful subjects... have taken upon us to assemble to reform all such disordered doings as have been brought about by certain new set-up nobles about the Queen's Majesty, who have subverted the ancient nobility and the true ancient Catholic faith of this realm."*

Proclamation issued by the Northern Earls upon storming Durham Cathedral, tearing up the English Book of Common Prayer, and celebrating Latin Catholic mass.

Hinge Question: *How does this proclamation reveal whether the Northern Earls rebelled out of genuine religious devotion or aristocratic resentment against William Cecil's centralizing Protestant council?*

SECTION 2 THE EXCOMMUNICATION SHOCKWAVE & THE RIDOLFI CONSPIRACY, 1570–1572

[2.1] The suppression of the northern earls was immediately overshadowed by an international spiritual earthquake. On 25 February 1570, Pope Pius V issued the fateful Papal Bull ***Regnans in Excelsis***. In blistering Latin, the Pope declared Elizabeth a heretic, stripped her of her royal title, and commanded all Catholic subjects to withdraw their civil obedience on pain of excommunication. This fatal decree shattered Elizabeth's decade-long policy of toleration: overnight, every devout English Catholic was transformed in the eyes of the law from an eccentric recusant into an existential traitor whose religious duty was the violent deposition of their sovereign.

[2.2] Foreign assassination conspiracies swiftly followed. In 1571, an Italian Catholic banker residing in London, **Roberto Ridolfi**, constructed a vast international conspiracy. The Ridolfi Plot aimed to assassinate Elizabeth, land 10,000 Spanish veterans under the Duke of Alba at Harwich, marry Mary, Queen of Scots to the Duke of Norfolk, and place Mary upon the English throne as a client monarch of Catholic Spain and the Papacy. Ridolfi traveled personally to Brussels, Rome, and Madrid, securing formal letters of endorsement from Pope Pius V and King Philip II.

[2.3] However, William Cecil's nascent surveillance network intercepted cipher dispatches hidden in the luggage of Ridolfi's courier at Dover. Under interrogation in the Tower of London, codebreakers decrypted the letters, uncovering Norfolk's treasonous signature. Norfolk was arrested, convicted of high treason by his peers, and beheaded on Tower Hill in June 1572. Parliament passed the ferocious **Treasons Act (1571)**, making it high treason to publish papal bulls or claim Elizabeth was not the lawful queen. While Parliament passionately demanded Mary Stuart's execution as well, Elizabeth stubbornly refused to execute an anointed queen, banishing the Spanish Ambassador Guerau de Spes instead.

PRIMARY RECORD DECRYPTED CIPHER INTERCEPT (THOMAS PHELIPPES) 17 July 1586

Source B: Mary Stuart's Fatal Letter to Anthony Babington

> *"When all is prepared both within and without the realm, let the great design be set on foot... Then shall it be time to set the six gentlemen to work, taking order upon the accomplishing of their design, that I may be suddenly transported out of this place before Her Majesty's forces can assemble."*

The fatal letter intercepted by Sir Francis Walsingham's intelligence network, in which Mary endorsed Babington's plot to assassinate Elizabeth with the words: 'Set the six gentlemen to work.'

Hinge Question: *Why did Mary's written approval of the 'six gentlemen' make her execution an unavoidable legal and political imperative under the 1584 Bond of Association?*

CORE DISCIPLINARY VOCABULARY • SPECIFICATION TERMS KT 2.1 GLOSSARY

RECUSANCY	PAPAL BULL	BOND OF ASSOCIATION	REGICIDE
Refusal to attend mandatory Church of England services, punished by statutory fines.	An official formal proclamation issued by the Pope with the force of canon law.	A 1584 pledge binding signatories to execute anyone attempting or benefiting from regicide.	The deliberate murder of an anointed sovereign monarch, viewed as treason and cosmic sin.

KT 2.1 ENQUIRY STUDY DISCIPLINARY ANALYSIS

Plots and Revolts at Home, 1569–1587 (Continued)

SECTION 3 THE JESUIT INFILTRATION & THE THROCKMORTON PLOT, 1580–1584

[3.1] By 1580, the threat to Elizabeth entered a lethal ideological phase with the arrival of the **Jesuit mission**. Highly trained, zealous Catholic priests—most famously Edmund Campion and Robert Persons—were smuggled into England from European seminaries, operating through secret 'priest holes' in Catholic country manors. Their mission was not merely spiritual comfort; the Elizabethan state viewed them as clandestine enemy agents sent to incite holy war. In December 1581, Campion was arrested, savagely racked in the Tower, and publicly executed at Tyburn. Parliament retaliated with the 1581 Act to Retain the Queen's Subjects in Due Obedience, raising recusancy fines to an impossible **£20 a month**—bankrupting Catholic gentry.

[3.2] In 1583, another sophisticated foreign-backed conspiracy was unmasked: the **Throckmorton Plot**. Conceived by Francis Throckmorton, a young Catholic gentleman who acted as courier between Mary Stuart and the Spanish Ambassador Bernardino de Mendoza, the plot planned an invasion of Sussex by French Catholic forces under the Duke of Guise, funded by Philip II and blessed by the Papacy. The objective was the assassination of Elizabeth and the immediate enthronement of Mary Stuart.

[3.3] Sir Francis Walsingham, now Principal Secretary, put Throckmorton under intense surveillance. Arrested with incriminating lists of Catholic conspirators and harbour soundings, Throckmorton was subjected to the agonies of the rack until he confessed the entire network. Throckmorton was executed at Tyburn, and Mendoza was expelled from England. In response to this mortal peril, the Privy Council drafted the terrifying **Bond of Association (1584)**: thousands of English gentlemen signed a solemn pledge binding themselves to hunt down and murder not only anyone who attempted regicide against Elizabeth, but also anyone in whose name or benefit such an attempt was made—a direct death sentence targeting Mary Stuart.

KEY HISTORICAL FIGURE 1532–1590

Sir Francis Walsingham

PRINCIPAL SECRETARY & SPYMASTER GENERAL TO ELIZABETH I

Elizabeth's brilliant and ruthless director of intelligence. He established a vast clandestine network of 53 overseas informants, double-agents, and cryptographers to uncover and dismantle Catholic plots against the Queen's life.

DECISIVE ACTIONS:

- Recruited cryptographer Thomas Phelippes to decipher encrypted ciphers intercepted from Mary, Queen of Scots.
- Turned Catholic courier Gilbert Gifford into a double-agent, smuggling messages in waterproof beer barrels to trap Mary.
- Drafted the 1584 Bond of Association, legally binding English subjects to execute anyone plotting against Elizabeth.

SECTION 4 WALSINGHAM'S CIPHER STING & THE FOTHERINGHAY EXECUTION, 1586–1587

[4.1] The existential crisis reached its dramatic climax in the summer of 1586 with the **Babington Plot**. Anthony Babington, a wealthy Derbyshire Catholic gentleman, organized a circle of Catholic conspirators committed to murdering Elizabeth and rescuing Mary from captivity. Unknown to the conspirators, Sir Francis Walsingham had constructed a masterly counter-espionage trap. Walsingham turned a Catholic courier, **Gilbert Gifford**, into a double-agent. Gifford arranged for Mary's letters to be smuggled in and out of her secure quarters at Chartley Manor hidden inside watertight beer barrels.

[4.2] Dispatches were intercepted and decoded by Walsingham's cryptographer, **Thomas Phelippes**. When Mary replied on 17 July 1586 approving assassination (*"set the six gentlemen to work"*), Phelippes drew a gallows emblem. Armed with cryptographic proof, Walsingham struck: Babington and conspirators were arrested, racked, and executed in St Giles' Fields.

[4.3] In October 1586, Mary was convicted at Fotheringhay Castle under the Act for the Queen's Safety. Elizabeth hesitated for four months over executing an anointed queen before signing the warrant. The Privy Council dispatched it secretly, and on **8 February 1587**, Mary was beheaded. Her execution eliminated the domestic Catholic figurehead, but in Madrid, Philip II resolved upon total invasion. The execution also removed the prospect of a French-allied Catholic queen ruling England, giving Philip II undisputed papal justification to launch the Armada.

CORE STRATEGIC MECHANISM COUNTER-ESPIONAGE • 1586

The Anatomy of Walsingham's Intelligence Apparatus

Walsingham operated sixteenth-century Europe's most sophisticated counter-espionage network, relying on three coordinated pillars:

- **Intercept & Decryption:** Cryptographer Thomas Phelippes used letter-frequency analysis to break substitution ciphers and forged postscripts (adding a gallows emblem) to identify co-conspirators.
- **Agent Provocateurs & Double-Agents:** Catholic turncoats like Gilbert Gifford enabled correspondence to flow through Chartley Manor beer barrels, ensuring conspirators committed treason on paper.
- **Statutory Entrapment:** Walsingham withheld arrests until Mary personally endorsed Elizabeth's murder, securing incontrovertible legal proof for her trial under the 1584 Bond of Association.

Strategic Legacy: Walsingham turned the conspirators' own secrecy into their death trap, eliminating Mary Stuart without provoking the immediate domestic rebellion Elizabeth feared.

KEY CHRONOLOGY • FOUR CAUSAL TURNING POINTS KT 2.1 SEQUENCE

Nov 1569 • Revolt of Northern Earls
Earls seize Durham Cathedral, restore Latin Mass; crushed by royal army; 450 executed.

Feb 1570 • Papal Bull *Regnans in Excelsis*
Pope Pius V excommunicates Elizabeth; commands subjects to depose her on pain of anathema.

Jul 1586 • Babington Cipher Decrypted
Phelippes deciphers Mary's approval to assassinate Elizabeth; conspirators arrested and hanged.

8 Feb 1587 • Execution of Mary Stuart
Mary beheaded at Fotheringhay Castle under Bond of Association, eliminating Catholic figurehead.

ENQUIRY 2 1HI0/B4 • KEY TOPIC 2.2

Relations with Spain, 1569–1585

Historical Enquiry: How did commercial piracy in the New World, ideological warfare in the Netherlands, and shifting European alliances shatter Anglo-Spanish peace?

SECTION 1 THE NEW WORLD MONOPOLY & HAWKINS' SAN JUAN DE ULÚA BETRAYAL, 1568–72

[1.1] In the mid-sixteenth century, King Philip II of Spain presided over the most formidable global empire since ancient Rome. Fueled by mountains of silver from Potosí and Zacatecas, the Spanish Empire encompassed Spain, Portugal, the Spanish Netherlands, southern Italy, the Philippines, and vast American territories. Under Spanish colonial law, foreign merchants were strictly barred from trading with the New World without a royal license—a monopoly Philip enforced with lethal naval violence. English merchants and mariners, however, viewed this closed economic system as an unacceptable barrier to legitimate trade.

[1.2] In 1568, Anglo-Spanish commercial rivalry erupted into bloody betrayal at the Battle of **San Juan de Ulúa** off the Mexican coast. John Hawkins and his young cousin Francis Drake had entered the harbour under a formal flag of truce to repair storm damage and trade. The newly arrived Spanish Viceroy, Don Martín Enríquez, agreed to the truce but launched a treacherous surprise attack, sinking four English ships and slaughtering over a hundred English sailors. Drake and Hawkins barely escaped aboard two tiny vessels, enduring starvation on their voyage home. Drake returned to Devon swearing an unyielding vendetta against the Spanish Crown.

[1.3] Operating under royal letters of marque, Drake launched audacious privateering raids against Spanish treasure transit routes. In 1572, Drake raided the Isthmus of Panama, ambushing the Spanish Silver Train at **Nombre de Dios**. Overcoming Spanish guards, Drake captured over £20,000 in silver and gold bullion. Elizabeth turned a blind eye to these piratical exploits: with Crown revenues perpetually stretched, plundered Spanish bullion provided essential revenue while bleeding Philip II's Atlantic supply lines without provoking formal war.

PRIMARY RECORD CONFIDENTIAL DIPLOMATIC REPORT TO THE SPANISH CROWN 6 April 1581

Source A: Ambassador Bernardino de Mendoza's Dispatch to Philip II

> *"The Queen has been at Deptford to feast on Drake's ship... and there conferred upon him the accolade of knighthood, telling him that the King of Spain had demanded his head and she had a gilded sword with which to strike it off. This action is an intolerable insult to Your Majesty and an open defiance of your sovereign authority in the Indies."*

Written by Mendoza after Queen Elizabeth boarded the Golden Hind at Deptford and publicly knighted Francis Drake, directly rejecting Spanish demands that Drake be executed as an international pirate.

Hinge Question: *Why did Elizabeth's public knighting of Drake mark an irreversible point of no return in Anglo-Spanish diplomatic relations?*

SECTION 2 THE GOLDEN HIND & THE PACIFIC PLUNDER, 1577–1580

[2.1] In November 1577, Francis Drake sailed from Plymouth with five small vessels on an expedition secretly funded by Queen Elizabeth and members of the Privy Council. While officially announced as an exploration voyage to find the mythical Great South Land, Drake's secret objective was far more daring: to navigate the treacherous Straits of Magellan and strike the unguarded Pacific coast of South America, where Spain kept no naval warships because they believed no foreign ship could survive the passage.

[2.2] Rechristening his flagship the ***Golden Hind***, Drake emerged into the Pacific in 1578, having lost four ships to storms and mutiny. Over the next twelve months, Drake wreaked catastrophic havoc along the coasts of Chile and Peru. He raided Valparaíso and Callao, plundering churches and merchant vessels. In March 1579, Drake tracked down the great Spanish treasure galleon *Nuestra Señora de la Concepción* —contemptuously nicknamed the ***Cacafuego*** ('Shitfire') by Spanish sailors for its heavy broadsides. Caught entirely by surprise, the Spanish captain surrendered without firing a shot.

[2.3] Drake transferred **26 tons of silver bullion**, 80 pounds of pure gold, and 13 chests of minted coin into the hold of the *Golden Hind*. Fearing Spanish ambush if he returned via Cape Horn, Drake sailed north, landed in California to claim 'New Albion' for Elizabeth, and crossed the uncharted Pacific, navigating the Indian Ocean and rounding the Cape of Good Hope. In September 1580, Drake sailed back into Plymouth Sound. The plunder was astronomical: valued at over **£400,000**, Elizabeth's half-share exceeded the Crown's ordinary annual expenditure, clearing all national foreign debts overnight.

PRIMARY RECORD SPANISH VICEREGAL DISPATCH TO MADRID September 1568

Source B: Don Martín Enríquez's Official Report on San Juan de Ulúa

> *"Finding these English heretic corsairs anchored insolently in our royal port, I gave orders that our armed galleons should hem them in... Although they pleaded a treaty of replenishment, we fell upon their flagship with artillery and small arms, sinking three of their vessels and slaying many heretics. The pirate Drake and Hawkins escaped by flight in two small barks."*

Spanish official report describing the surprise naval ambush against John Hawkins and Francis Drake's fleet in Mexico, where Spanish warships attacked English vessels under a truce flag, leaving Drake with an unyielding desire for vengeance.

Hinge Question: *How did the Spanish betrayal at San Juan de Ulúa transform English privateering from commercial smuggling into a religious and patriotic vendetta?*

CORE DISCIPLINARY VOCABULARY • SPECIFICATION TERMS

KT 2.2 GLOSSARY

PRIVATEERING
State-sanctioned piracy where armed merchant ships operated under government letters of marque.

CIRCUMNAVIGATION
Sailing entirely around the earth, achieved by Drake aboard the Golden Hind (1577–80).

COUNCIL OF BLOOD
The Duke of Alba's brutal military tribunal in the Netherlands executing thousands of Protestants.

TREATY OF JOINVILLE
Secret 1584 alliance uniting Spain and the French Catholic League against European Protestantism.

KT 2.2 ENQUIRY STUDY DISCIPLINARY ANALYSIS

Relations with Spain, 1569–1585 (Continued)

SECTION 3 THE DEPTFORD DEFIANCE & THE LOW COUNTRIES CRUCIBLE, 1576–1581

[3.1] On 4 April 1581, Queen Elizabeth enacted one of the most provocative pieces of political theatre in European diplomatic history. Boarding the *Golden Hind* anchored at Deptford on the Thames, Elizabeth publicly **knighted Francis Drake** in front of the Spanish Ambassador, Bernardino de Mendoza. Philip II had demanded Drake's head as an international pirate and the return of the plundered silver. By dubbing Drake Sir Francis, Elizabeth overtly endorsed state-sponsored piracy, signaling to Madrid that England would no longer bend to Spanish imperial intimidation.

[3.2] Simultaneously, the geopolitical crucible of the **Spanish Netherlands** deteriorated into total crisis. Across the English Channel, Dutch Protestants had been in open revolt against Spanish taxation and Catholic persecution since 1566. Philip responded by sending the brutal Duke of Alba with 10,000 veteran troops, establishing the 'Council of Blood' which executed over a thousand Dutch rebels. The presence of a massive Spanish army directly opposite the Thames estuary was a mortal threat to England's security and ruined the vital Antwerp cloth market.

[3.3] In November 1576, unpaid Spanish troops mutinied and launched the horrifying **'Spanish Fury'**, sacking Antwerp, slaughtering 7,000 citizens, and burning a third of the city. In revulsion, all seventeen Dutch provinces signed the **Pacification of Ghent**, demanding the expulsion of Spanish forces. Elizabeth pursued a precarious policy of proxy defense: she secretly loaned £100,000 to the Dutch rebels, allowed Protestant privateers ('Sea Beggars') to shelter in English ports, and financed foreign mercenary armies to tie down Spanish troops without declaring formal war.

KEY HISTORICAL FIGURE 1540–1596

Sir Francis Drake

NAVAL COMMANDER, PRIVATEER & GLOBAL CIRCUMNAVIGATOR

England's most famous 'sea dog' and naval strategist. His audacious privateering expeditions challenged the Spanish Empire's New World monopoly, enriched the English Crown, and proved English naval supremacy.

DECISIVE ACTIONS:

- Executed the historic 1577–1580 global circumnavigation aboard the Golden Hind, plundering Spanish Pacific settlements.
- Captured the Spanish galleon Cacafuego in 1579, returning to Plymouth with over £400,000 in silver and gold bullion.
- Publicly knighted by Queen Elizabeth aboard the Golden Hind at Deptford on 4 April 1581, defying King Philip II.

SECTION 4 THE ASSASSINATION OF WILLIAM THE SILENT & THE JOINVILLE TRAP, 1584

[4.1] By 1584, Elizabeth's delicate policy of proxy warfare collapsed catastrophically. In July 1584, the charismatic leader of the Dutch Revolt, **William of Orange ('William the Silent')**, was shot dead in his home at Delft by a Catholic fanatic, Balthasar Gérard. Philip II had publicly placed a bounty of 25,000 crowns on William's head, proving that a Protestant head of state could be assassinated by Catholic agents. William's death left the Dutch rebellion leaderless and facing immediate destruction at the hands of the brilliant Spanish commander, Alexander Farnese, Duke of Parma.

[4.2] Weeks earlier, Elizabeth's French proxy, the Duke of Alençon (brother of the French King), died of fever. His death extinguished French military opposition to Spain in the Low Countries and threw France into a dynastic succession crisis, as the heir to the French throne was now the Protestant Henry of Navarre. Philip II moved ruthlessly to exploit this power vacuum, sealing a diplomatic masterstroke that isolated England completely.

[4.3] In December 1584, Philip II signed the secret **Treaty of Joinville** with the French Catholic League, led by the Duke of Guise. Philip agreed to finance Guise's private army to wage war against French Protestants and block Henry of Navarre's accession. In return, Guise guaranteed that France would not oppose Spanish military operations in the Netherlands. For England, the Treaty of Joinville was a terrifying geopolitical nightmare: Europe's two Catholic superpowers were now united in a religious crusade, with England left utterly isolated. Strategic ambiguity was no longer an option: Elizabeth was forced to choose between direct military intervention or absolute Spanish subjugation of Western Europe. The secret pact neutralized French interference in the Low Countries, leaving the English realm with no continental buffer against Parma's veteran tercios.

CORE STRATEGIC MECHANISM ECONOMIC WARFARE • 1577–80

The Cacafuego Haul: Geopolitical Economic Warfare

Drake's privateering was not merely rogue piracy; it was state-sanctioned economic warfare against the Spanish Empire:

- **Imperial Disruption:** Spanish colonial ports on the Pacific coast of Peru and Chile were unfortified because Spain assumed no foreign ship could navigate the Straits of Magellan.
- **Fiscal Windfall:** Drake captured 26 tons of silver bullion, 80 pounds of gold, and 13 chests of coin—worth £400,000, exceeding the English Crown's entire annual income.
- **Geopolitical Defiance:** Elizabeth paid off all foreign Crown debts, funded the Levant Company, and openly knighted Drake at Deptford, proving England would no longer bend to Spanish hegemony.

Strategic Legacy: Drake's plunder demonstrated Spanish naval vulnerability, providing England with financial independence while driving Philip II toward armed invasion.

KEY CHRONOLOGY • FOUR CAUSAL TURNING POINTS KT 2.2 SEQUENCE

Sep 1568 • Ambush at San Juan de Ulúa
Spanish warships betray Hawkins and Drake under truce flag; privateering becomes holy vendetta.

1577–80 • Global Circumnavigation
Drake traverses Straits of Magellan on Golden Hind; plunders Pacific coast of Spanish Americas.

Mar 1579 • Capture of the *Cacafuego*
Drake seizes 26 tons of silver and gold bullion worth £400,000, wiping out English Crown debts.

4 Apr 1581 • Drake Knighted at Deptford
Elizabeth boards Golden Hind, publicly knighting Drake in defiance of King Philip II's protests.

EXAM STRATEGY • EDEXCEL PAPER 2 (OPTION B4) Question 3: Evaluative Essay [16 marks + 4 marks SPaG • 25 mins]

Exam Challenge: "Commercial rivalry was the main cause of conflict between England and Spain in the years 1576–85." How far do you agree? Explain your answer. [16 marks + 4 marks SPaG]

ENQUIRY 3 1HI0/B4 • KEY TOPIC 2.3

The Outbreak of War with Spain, 1585–1588

Historical Enquiry: Why did the Treaty of Nonsuch, Leicester's Dutch campaign, and Drake's Cadiz raid transform Cold War proxy conflict into open military invasion?

SECTION 1 THE RUBICON CROSSED: THE TREATY OF NONSUCH, AUGUST 1585

[1.1] In the summer of 1585, Queen Elizabeth crossed the Rubicon. With Dutch resistance crumbling and Parma capturing Antwerp, the Dutch Estates-General formally offered Elizabeth the sovereign crown of the Netherlands. Mindful of provoking Philip II into an immediate crusade, Elizabeth prudently declined the crown. However, she could not permit Spanish veteran armies to control the deep-water ports of the Low Countries. On **10 August 1585**, Elizabeth signed the historic **Treaty of Nonsuch** at her Surrey palace.

[1.2] Under the terms of Nonsuch, Elizabeth agreed to finance and dispatch an English expeditionary force of **6,400 foot soldiers and 1,000 cavalry**, placing them under the command of her most trusted court favourite, Robert Dudley, Earl of Leicester. To guarantee repayment for military subsidies, the Dutch surrendered two vital deep-water **'cautionary towns'–Flushing and Brill**–which were garrisoned by English troops. Elizabeth's war aims were strictly defensive: she did not seek Dutch independence, but rather the preservation of Dutch Protestantism and the withdrawal of Spanish forces.

[1.3] However, to King Philip II in Madrid, the Treaty of Nonsuch was an explicit, undeniable declaration of open war. For nearly three decades, England had harassed Spanish shipping, protected heretics, and funded rebellion. Now, English soldiers in royal uniform were fighting Spanish troops on sovereign Habsburg territory. Philip ordered the immediate seizure of all English merchant ships in Spanish ports and commenced mobilization for the *'Enterprise of England'*–the full-scale naval invasion of England.

PRIMARY RECORD | CROWN ROYAL DISPATCH TO THE LOW COUNTRIES | 10 February 1586

Source A: Queen Elizabeth's Royal Reprimand to Leicester

> *"We could never have imagined that a man raised up by ourself, and extraordinarily favoured by us above any other subject of this land, would in such contempt of our commandment have broken our instructions... Our express pleasure therefore is that all delays set apart, you do upon your allegiance resign that government and title which you have taken upon you."*

Elizabeth's blistering reprimand to Leicester after he accepted the title of 'Governor-General of the United Provinces' from the Dutch rebels, directly defying her strict orders that England was not seeking to seize Dutch sovereignty.

Hinge Question: *Why did Leicester's acceptance of executive power in the Netherlands threaten Elizabeth's entire diplomatic justification for the 1585 Treaty of Nonsuch?*

SECTION 2 LEICESTER'S LOW COUNTRIES MISADVENTURE & BETRAYAL, 1585–87

[2.1] Despite immense financial expenditure, Leicester's military intervention in the Low Countries descended into political farce and tactical failure. Upon landing in Flushing in December 1585, Leicester made a catastrophic political blunder: in January 1586, he accepted the title of **'Governor-General of the United Provinces'** from the Dutch Estates. When news reached London, Elizabeth was incandescent with fury: by accepting sovereign executive title, Leicester directly contradicted her public stance that she had no imperial ambitions over Philip's territory. Elizabeth sent a blistering letter of reprimand, publicly humiliating Leicester before his allies.

[2.2] The campaign was crippled by administrative chaos and financial neglect. Elizabeth, horrified by the spiraling costs of continental war, withheld funds; Leicester's soldiers went unpaid, poorly fed, and lacked basic winter coats, leaving hundreds to die of disease in muddy trenches. Furthermore, Leicester alienated Dutch merchants by attempting to ban all Dutch trade with Spanish territories–a commercial ban Dutch traders completely ignored.

[2.3] Military disaster followed in January 1587 when two English Catholic officers, **Sir William Stanley and Rowland York**, defected to the Spanish, surrendering the vital defensive forts of Deventer and Zutphen without firing a shot. This treachery shattered Anglo-Dutch trust. Although English forces fought with great gallantry at the **Battle of Zutphen** in September 1586–where the celebrated poet and courtier Sir Philip Sidney was mortally wounded–Leicester failed to capture any deep-water ports or halt Parma's steady advance. In December 1587, Leicester resigned his command and returned to England in disgrace.

PRIMARY RECORD | EYEWITNESS NAVAL DISPATCH FROM CADIZ HARBOUR | 27 April 1587

Source B: Sir Francis Drake's Cadiz Dispatch to Walsingham

> *"We have sunk, burned, and brought away four and thirty great ships of the King of Spain, laden with provisions and naval munition... We have also burned great stores of seasoned timber and barrel staves prepared for their casks, so that the King of Spain shall have much ado to find water casks for his fleet. Assure Her Majesty that by God's grace we have singed the King of Spain's beard."*

Drake's celebratory dispatch following his pre-emptive strike on Cadiz, reporting the destruction of thirty-four Spanish warships and the burning of thousands of tons of provisions, delaying the Armada's departure by over a year.

Hinge Question: *Why was the destruction of naval barrel staves and food casks at Cadiz more decisive in crippling the Armada than the destruction of Spanish galleons?*

CORE DISCIPLINARY VOCABULARY • SPECIFICATION TERMS KT 2.3 GLOSSARY

TREATY OF NONSUCH	CAUTIONARY TOWNS	GOVERNOR-GENERAL	BARREL STAVES
Formal 1585 treaty providing 7,400 English soldiers and cash subsidies to Dutch rebels.	Strategic Dutch deep-water ports (Flushing and Brill) held by English garrisons as collateral.	Executive title accepted by Leicester in 1586, implying English sovereignty over the Dutch.	Seasoned oak wooden planks required to construct watertight casks for fresh water and food.

KT 2.3 ENQUIRY STUDY DISCIPLINARY ANALYSIS

The Outbreak of War with Spain, 1585–1588 (Continued)

SECTION 3 DRAKE'S CARIBBEAN RAMPAGE: SACKING THE SPANISH EMPIRE, 1585–1586

[3.1] While Leicester foundered on the land, Francis Drake unleashed total war across the oceans. In September 1585, Elizabeth authorized Drake to launch a pre-emptive strike against Spanish imperial commerce. Commanding a fleet of twenty-five warships and 2,000 soldiers, Drake raided the Galician coast before steering across the Atlantic into the heart of the Spanish Caribbean.

[3.2] Drake struck with lightning speed. On New Year's Day 1586, he assaulted **Santo Domingo** (Hispaniola), the oldest Spanish capital in the Americas, sacking the city and burning half its buildings until the terrified governor paid a ransom of 25,000 ducats. Drake then stormed **Cartagena** (modern Colombia), the heavily fortified hub of the Spanish treasure fleet, holding the city for six weeks and extorting a massive ransom of 110,000 ducats. Sparing time on his return voyage, Drake razed the Spanish fortress of St Augustine in Florida.

[3.3] Although the expedition yielded disappointing financial profits due to rampant yellow fever among the crew, its geopolitical impact was devastating. Drake proved that the Spanish Empire was a hollow colossus whose Atlantic colonies were virtually defenceless. Spanish merchant houses collapsed, the Bank of Genoa suffered runs, and Philip II's credit rating was so severely impaired that international financiers refused to advance further loans for the planned Armada invasion.

KEY HISTORICAL FIGURE 1532–1588

Robert Dudley, Earl of Leicester

LIEUTENANT-GENERAL OF ENGLISH FORCES IN THE LOW COUNTRIES

Elizabeth's lifelong favourite and leading military commander. He championed forward Protestant intervention in Europe, commanding the 7,400-strong English expeditionary force dispatched to the Netherlands in 1585.

DECISIVE ACTIONS:

- Appointed Lieutenant-General of English forces under the Treaty of Nonsuch, arriving in Flushing in December 1585.
- Enraged Elizabeth by accepting the title of Governor-General of the United Provinces in January 1586 without permission.
- Fought Spanish forces under the Duke of Parma at Zutphen (1586), failing to capture deep-water ports before returning in 1587.

SECTION 4 SINGEING THE KING OF SPAIN'S BEARD: THE CADIZ RAID, APRIL 1587

[4.1] By the spring of 1587, Walsingham's intelligence agents confirmed that Philip II had assembled a massive invasion armada in Spanish and Portuguese ports. Recognizing that defensive waiting would prove fatal, Elizabeth dispatched Francis Drake with four royal galleons and twenty armed merchantmen with orders to *"impeach the gathering of the King of Spain's fleet"*. On **19 April 1587**, Drake sailed boldly into the heavily defended inner harbour of **Cadiz**.

[4.2] Over the next thirty-six hours, Drake executed a masterclass in naval daring. Bombarding shore batteries, Drake's ships maneuvered through the harbour, sinking, burning, or capturing between **24 and 36 major Spanish vessels**, including massive merchantmen loaded with naval ordnance and food supplies. Drake then sailed along the Portuguese coast, capturing the fortress of Sagres and destroying coastal fishing fleets before intercepting the huge Portuguese carrack *San Felipe* off the Azores, capturing £108,000 in rich spices and silk.

[4.3] Drake famously boasted that he had *"singed the King of Spain's beard"*. The raid was a logistical catastrophe for Philip II. Drake burned over **1,700 tons of seasoned oak barrel staves** on Cadiz wharves. Philip was forced to construct replacement casks from unseasoned green wood, which leaked fresh water and rotted food during the 1588 campaign. Crucially, the Cadiz raid delayed the launch of the Armada by more than twelve months, granting England a vital year to build warships, train county militias, and construct channel beacons. By intercepting the San Felipe, Drake also captured navigational secrets and Portuguese merchant cargo that financed English mobilization throughout 1587.

CORE STRATEGIC MECHANISM LOGISTICAL SABOTAGE • 1587

The Cadiz Barrel Staves Disaster: Logistical Sabotage

Drake's raid on Cadiz harbour in April 1587 inflicted damage far beyond sinking Spanish warships:

- **Destruction of Cooperage:** Drake burned over 1,700 tons of seasoned oak barrel staves stockpiled on the Cadiz wharves to build watertight casks for food, fresh water, and beer.
- **Unseasoned Wood Replacement:** Philip II was forced to construct emergency casks from unseasoned green wood, which shrank, leaked, and rotted food supplies during the 1588 voyage.
- **Delayed Launch:** The raid delayed the Armada's departure by more than twelve months, pushing the campaign into the stormy late-summer Atlantic weather window.

Strategic Legacy: By destroying naval cooperage, Drake ensured that Spanish provisions spoiled before the Armada reached the Channel, crippling crew stamina before battle commenced.

KEY CHRONOLOGY • FOUR CAUSAL TURNING POINTS KT 2.3 SEQUENCE

Dec 1584 • Treaty of Joinville
Secret alliance between Spain and French Catholic League; Elizabeth isolated against Spanish superpower.

Aug 1585 • Treaty of Nonsuch
Elizabeth signs formal pact with Dutch rebels, dispatching 7,400 English troops under Leicester.

Jan 1586 • Governor-General Clashes
Leicester accepts executive Dutch title without royal consent; Elizabeth infuriated; campaign founders.

Apr 1587 • Raid on Cadiz Harbour
Drake destroys 36 Spanish ships and burns seasoned barrel staves, delaying Armada launch by a year.

EXAM STRATEGY • EDEXCEL PAPER 2 (OPTION B4) Question 2: Explain Why [12 marks • 18 mins]

Exam Challenge: Explain why England became involved in the Netherlands in 1585. [12 marks]

ENQUIRY 4 1HI0/B4 • KEY TOPIC 2.4

The Spanish Armada: Strategy, Conflict & Defeat, 1588

Historical Enquiry: Why did Philip II's grand invasion plan disintegrate in the English Channel, and what were the decisive factors behind the English naval victory?

SECTION 1 THE GRAND ENTERPRISE: PHILIP II'S FLAWED STRATEGY, 1588

[1.1] In May 1588, King Philip II's mighty **'Enterprise of England'** finally set sail from Lisbon. Blessed by Pope Sixtus V with a papal crusader banner, the Armada was the largest naval invasion fleet ever assembled: **130 ships, 2,431 cannons, and nearly 30,000 men** (comprising 19,000 soldiers and 8,000 sailors). Philip appointed the Alonso Pérez de Guzmán, **Duke of Medina Sidonia**, as supreme commander. Medina Sidonia was a high-ranking grandee who possessed immense administrative talent but had zero naval combat experience, repeatedly pleading with Philip to cancel the expedition due to poor provisions and ammunition shortages.

[1.2] Philip's grand strategy relied upon a fatal coordination challenge: the Armada was ordered to sail up the English Channel without attacking English ports, anchor off the coast of Flanders, rendezvous with the **Duke of Parma's 27,000 veteran infantry** (the Army of Flanders), and escort their flat-bottomed invasion barges across the Channel to land in Kent and march on London. Yet the plan was fundamentally flawed from its conception. Spain controlled no deep-water ports along the shallow Flemish coastline: deep-draft Spanish galleons could not enter the sandbanks of Dunkirk or Sluys, while Parma's barges could not leave harbour under blockade by armed Dutch Protestant flyboats.

[1.3] Furthermore, maritime communications were slow and disjointed. It took up to forty-eight hours for small courier pinnaces to travel between Medina Sidonia in the Channel and Parma in Bruges. Parma was not even mobilized when the Armada arrived off Calais. Philip had devised a rigid military plan on paper in the Escorial palace that took no account of tide, weather, Dutch naval blockades, or English combat superiority.

PRIMARY RECORD | CONFIDENTIAL SPANISH FLAGSHIP MEMORANDUM | 24 June 1588

Source A: Duke of Medina Sidonia's Secret Letter to Philip II

> *"I must represent to Your Majesty that our fleet is in very bad condition... We are short of experienced mariners and skilled gunners; the provisions of bread and beef are already rotting and spoiled by damp casks, and the water is foul. Furthermore, we have no safe deep-water port in Flanders where our great ships can ride to join with the Prince of Parma. I beseech Your Majesty to consider whether this voyage can succeed."*

A desperate, candid appeal from Medina Sidonia begging King Philip II to reconsider the Armada expedition, warning that the Spanish fleet was short of experienced gunners, lacked fresh provisions, and possessed no deep-water harbour to meet the Duke of Parma.

Hinge Question: *How does Medina Sidonia's private despair reveal the fatal strategic flaws inherent in Philip II's plan to coordinate an invasion across the English Channel?*

SECTION 2 THE RUNNING BATTLE: CRESCENT FORMATION VS. CULVERIN GUNNERY, JULY 1588

[2.1] On 29 July 1588, lookouts on the Cornish cliffs sighted the Armada approaching the Lizard. Warning beacons were lit across hilltops from Cornwall to London, mobilizing county militias under the Earl of Leicester at Tilbury. Medina Sidonia arrayed his 130 ships in a formidable **defensive crescent formation**, stretching seven miles wide. Heavily armed Portuguese and Castilian galleons formed the protective outer horns, shielding vulnerable supply hulks and troop transports in the center. The formation was designed to bait the English into close boarding combat, where Spain's elite tercios would overwhelm English crews.

[2.2] The English fleet, commanded by **Lord Howard of Effingham** with Drake and Hawkins as vice-admirals, sailed out of Plymouth harbour and seized the weather gauge, maintaining the advantage of the wind. Over the next six days, the English fleet shadowed the Armada up the Channel, engaging in running artillery duels off Plymouth, Portland Bill, and the Isle of Wight. The English consistently refused to close for boarding, exploiting revolutionary naval technology.

[2.3] Under Sir John Hawkins' direction as Treasurer of the Navy, England had constructed **'race-built' galleons**: sleek, low-castled warships that were significantly faster and more maneuverable than high-castled Spanish ships. Crucially, English ships were armed with long-range **culverin cannons** mounted on four-wheeled truck carriages, allowing trained gun crews to reload rapidly and fire 17-pound iron balls from standoff range. Although English gunnery failed to break the crescent formation during the Channel voyage, it prevented the Spanish from landing on the Isle of Wight to establish a secure base.

PRIMARY RECORD | OFFICIAL ENGLISH ADMIRALTY REPORT TO PRIVY COUNCIL | 8 August 1588

Source B: Lord Howard of Effingham's Post-Gravelines Dispatch

> *"Their force is wonderful great and strong, yet we pluck their feathers by little and little... The fireships put them from their anchors at Calais in great disorder, and this morning we have had a very sharp fight with them off Gravelines, wherein we have battered their great galleons through and through with our culverins, while our agile ships kept their distance and received little hurt."*

Lord Admiral Howard's dispatch immediately following the Battle of Gravelines, describing how English fireships scattered the Spanish fleet at Calais and allowed English culverin gunners to batter Spanish hulls without boarding.

Hinge Question: *Why did English naval commanders attribute their survival to divine intervention ('Flavit Deus') rather than solely to superior English gunnery and ship design?*

CORE DISCIPLINARY VOCABULARY • SPECIFICATION TERMS

KT 2.4 GLOSSARY

CRESCENT FORMATION
Defensive Spanish naval array protecting vulnerable supply hulks inside heavy outer galleons.

CULVERIN
Long-range English naval cannon firing a 17-pound ball with superior reload speed and range.

FIRESHIP (HELLBURNER)
Wooden vessel packed with gunpowder, pitch, and cannon shot set ablaze and drifted into anchored fleets.

PROTESTANT WIND
Violent south-westerly gale that blew the shattered Spanish Armada into the hostile North Sea.

KT 2.4 ENQUIRY STUDY DISCIPLINARY ANALYSIS

The Spanish Armada: Strategy, Conflict & Defeat, 1588 (Continued)

SECTION 3 MIDNIGHT TERROR AT CALAIS & THE BATTLE OF GRAVELINES, 7–8 AUGUST 1588

[3.1] On the evening of 6 August 1588, Medina Sidonia anchored the Armada in Calais roads, awaiting news from Parma. The Spanish position was intensely precarious: the fleet was exposed to the open sea with no harbour protection, while Parma sent word that his troops were not yet assembled and his barges could not venture out past Dutch blockades. Recognizing the Spanish vulnerability, Howard and Drake met aboard the *Ark Royal* to plan a decisive strike.

[3.2] At midnight on **7 August 1588**, the English unleashed terror. Eight old naval vessels were packed with pitch, tar, resin, and loaded cannons, set ablaze, and drifted with wind and tide straight into the dense Spanish anchorage. Panic swept the Armada: Spanish captains terrified of Antwerp 'hellburners' (exploding floating mines) frantically severed their anchor cables and fled into the darkness. When dawn broke on 8 August, the Armada's crescent formation was broken forever; ships were scattered, disorganised, and drifting helplessly toward the deadly sandbanks of Zeeland.

[3.3] Lord Howard seized the moment, launching the **Battle of Gravelines**. Closing to within 100 yards, English race-built galleons pummeled the scattered Spanish warships with continuous culverin broadsides. Spanish gun crews, trained for land warfare, were incapable of rapid reloading at sea and suffered horrific casualties on bloody, splinter-filled decks. Three great Spanish galleons were sunk or driven aground, and over 1,000 Spanish sailors were killed. English losses were astonishingly light: not a single English warship was sunk, and fewer than a hundred men were killed in battle. Medina Sidonia's invasion was shattered.

KEY HISTORICAL FIGURE 1536–1624

Charles Howard, Lord Howard of Effingham

LORD HIGH ADMIRAL OF ENGLAND & SUPREME NAVAL COMMANDER

Supreme commander of English naval forces against the Spanish Armada. A skilled aristocrat who managed the fierce rivalries between hot-headed captains like Drake and Hawkins, coordinating the decisive fireship strike at Calais.

DECISIVE ACTIONS:

- Maintained strategic command of the English fleet at Plymouth, shadowing the Armada up the Channel without risking close-quarters melee.
- Approved and executed the midnight fireship attack on the Spanish anchorage at Calais on 7–8 August 1588.
- Directed the running artillery bombardment at the Battle of Gravelines, exploiting superior culverin range to batter Spanish galleons.

SECTION 4 THE PROTESTANT WIND & THE AGONY OF THE ATLANTIC RETREAT, AUGUST–SEPTEMBER 1588

[4.1] With the Channel blocked by English ships and south-westerly winds blowing relentlessly, Medina Sidonia faced catastrophe. An invasion was impossible: Parma could not embark, the fleet lacked anchors, and ammunition was spent. Medina Sidonia ordered the fleet to flee north into the North Sea, sailing around the wild, stormy coasts of Scotland and Ireland to return to Spain.

[4.2] The retreat became an agonizing nightmare. In the North Atlantic, the fleeing fleet was battered by violent gales—hailed in England as the **'Protestant Wind'**. Short of food, drinking putrid water from unseasoned casks, and lacking anchors cut at Calais, ship after ship was hurled onto the jagged rocks of the Hebrides and the western coast of Ireland. Over twenty-five vessels were wrecked along the coasts of Antrim, Sligo, and Kerry; thousands of shipwrecked Spanish survivors were slaughtered by English garrisons or drowned in the pounding surf.

[4.3] Barely **65 battered ships and fewer than 10,000 starving, diseased men** limped back into Santander. In London, Queen Elizabeth rode to Tilbury on a white horse, famously declaring to her troops: *"I know I have the body but of a weak and feeble woman, but I have the heart and stomach of a king, and of a king of England too!"* Elizabeth ordered a victory medal struck with the words ***Flavit Deus et Dissipati Sunt*** ('God blew, and they were scattered'). The defeat of the Armada saved English Protestantism, shattered Spain's reputation of invincibility, and announced England's arrival as a global naval power. England established mastery of long-range standoff artillery tactics, forever changing the nature of naval warfare across the Atlantic and North Sea.

CORE STRATEGIC MECHANISM NAVAL TACTICAL REVOLUTION • 1588

The Culverin Revolution: Race-Built Galleons vs Floating Fortresses

The defeat of the Armada marked a revolutionary transformation in European naval warfare doctrine:

- **Ship Design:** John Hawkins designed 'race-built' English galleons—longer, lower, faster, and more maneuverable than high-castled Spanish floating fortresses built for land armies.
- **Gunnery Tactics:** English ships were armed with long-range culverins on four-wheeled truck carriages, allowing trained gunners to reload rapidly and fire 17-pound balls from distance.
- **Denying the Boarding Action:** Spanish doctrine relied on short-range heavy cannons to disable rigging before boarding with soldiers. English captains maintained standoff distance, denying Spain close combat.

Strategic Legacy: The English replaced medieval hand-to-hand boarding with standoff broadside artillery warfare, establishing modern naval combat doctrine for centuries.

KEY CHRONOLOGY • FOUR CAUSAL TURNING POINTS KT 2.4 SEQUENCE

May 1588 • Armada Departs Lisbon
Medina Sidonia commands 130 ships and 30,000 men to unite with Parma's invasion army in Flanders.

29 Jul 1588 • Crescent Sighted off Cornwall
Armada enters English Channel in impenetrable crescent; English race-built galleons shadow from behind.

7 Aug 1588 • Calais Fireship Attack
Eight drifting fireships strike anchored Spanish fleet at midnight; panic scatters defensive formation.

8 Aug 1588 • Battle of Gravelines
English culverins batter isolated Spanish galleons; Protestant wind blows crippled Armada north.

SYNOPTIC OVERVIEW KEY TOPIC 2 MASTER SYNTHESIS • 1569–1588

Key Topic 2: Thematic Synoptic Matrix & Historiographical Debate

Historical Assessment: Evaluating the escalation from covert domestic conspiracies and cold war piracy into total naval invasion in 1588.

THEMATIC COMPARATIVE MATRIX • CORE SPECIFICATION THEMES — **1569 CRISIS VS. 1588 REALITY**

THEMATIC DIMENSION	THE CRISIS IN 1569–70	ELIZABETH'S STRATEGIC MECHANISM	THE BALANCE SHEET BY 1588
1. Catholic Dynastic Threat	Mary Stuart alive in England; magnetic figurehead for Ridolfi, Throckmorton, and Babington assassination plots.	Constructed Walsingham's cipher-cracking sting; passed 1584 Bond of Association; executed Mary in Feb 1587.	Domestic Catholic figurehead eliminated forever; but execution triggered Philip II's immediate invasion crusade.
2. Commercial Cold War	Spanish trade monopoly barred English merchants from Americas; Hawkins betrayed at San Juan de Ulúa (1568).	State-sanctioned privateering: Drake's 1572 Nombre de Dios raid and 1577–80 circumnavigation; £400k Cacafuego haul.	English Crown debt cleared; Spanish Atlantic prestige shattered; Philip II bankrupted, driving him to war.
3. The Netherlands Crisis	Alba's veteran army on Channel coast; Spanish Fury at Antwerp (1576); William the Silent assassinated (1584).	Signed 1585 Treaty of Nonsuch; sent 7,400 troops under Leicester; seized cautionary towns Flushing and Brill.	Leicester failed tactically; but English presence tied down Parma and preserved Dutch Protestant resistance.
4. Counter-Espionage Machine	Papal Bull *Regnans in Excelsis* (1570) ordered subjects to depose Queen; Jesuit missionaries entering secretly.	Walsingham built European spy ring; employed cryptographer Phelippes; beer-barrel sting trapped Babington.	All four major assassination plots unmasked; Jesuit networks disrupted; Queen protected without civil war.
5. Pre-Emptive Naval Power	Royal Navy small and defensive; reliance on merchant conversions; coastal fortifications decaying.	Hawkins built race-built galleons; Drake's 1587 Cadiz raid burned 30+ ships and 1,700 tons of barrel staves.	Armada delayed by over a year; Spanish water casks spoiled; naval initiative seized permanently.
6. Naval Tactical Supremacy	Spanish naval reputation invincible; reliance on heavy troop transports and close hand-to-hand boarding.	Fireships at Calais scattered Spanish crescent; long-range culverin gunnery raked hulls at Gravelines.	Armada routed with half fleet destroyed; England emerged as paramount Protestant naval superpower.

THE CATHOLIC PLOTS & ANTI-CATHOLIC PENAL LEGISLATION MATRIX (1569–1587) — **DOMESTIC & DYNASTIC CONSPIRACIES**

CONSPIRACY / STATUTE	KEY CONSPIRATORS & FOREIGN BACKING	OBJECTIVES & PAPAL / SPANISH PLOT	OUTCOME & LEGISLATIVE RETALIATION
1. Northern Revolt (1569)	Earls of Northumberland & Westmorland; backed by Duke of Norfolk; vague Spanish promises.	Restore Catholicism, marry Norfolk to Mary Stuart, overthrow Cecil, and restore northern regional autonomy.	**Revolt crushed; 450 rebels executed; 1570 Papal Bull *Regnans in Excelsis* excommunicates Elizabeth.**
2. Ridolfi Plot (1571)	Roberto Ridolfi (banker), Duke of Norfolk, Mary Stuart, Pope Pius V, King Philip II.	Assassinate Elizabeth; invade England with 10,000 Spanish troops under Alba; place Mary on throne.	**Plot uncovered by Cecil; Norfolk beheaded (1572); 1571 Treason Act makes questioning Queen's legitimacy treason.**
3. Throckmorton Plot (1583)	Francis Throckmorton, French Catholic Duke of Guise, Spanish Ambassador Mendoza, Papacy.	French army funded by Philip II and Pope to invade Sussex, liberate Mary, and spark Catholic uprising.	**Walsingham broke cipher; Mendoza expelled; Bond of Association (1584) drafted; Throckmorton executed.**
4. Babington Plot (1586)	Anthony Babington, Mary Stuart, Jesuit priest John Ballard, Spanish Ambassador Mendoza.	Murder Elizabeth, rescue Mary from Chartley Hall, and launch simultaneous Spanish-French invasion.	**Walsingham's double-agent beer-barrel trap; cipher decoded; Mary Stuart tried and executed (Feb 1587).**
5. Anti-Catholic Statutes (1571–85)	Parliament, Privy Council, Cecil, Walsingham responding to seminary priests & Jesuits.	Criminalise incoming Jesuit missionaries (Campion/Persons) and punish Catholic recusancy systematically.	**1581 Act: recusancy fine raised to £20/mo (treason to convert); 1585 Act: death penalty for ordained priests in England.**

THE HISTORIOGRAPHICAL DEBATE • THREE INTERPRETATIONS OF THE ARMADA DEFEAT

HISTORICAL SCHOLARSHIP

1. TRADITIONAL WHIG (GARRETT MATTINGLY, 1959):
The Armada was an epic ideological clash between liberty and Counter-Reformation tyranny. English victory was driven by superior naval commanders (Drake, Howard) and tactical gunnery, completed by the 'Protestant Wind' validating God's favour on England.

2. REVISIONIST (GEOFFREY PARKER, 1988):
The Armada was doomed by Philip II's impossible grand strategy rather than English brilliance. Requiring Medina Sidonia to rendezvous with Parma without a deep-water port, while Dutch flyboats blockaded Flemish harbours, was an insurmountable logistical error.

3. POST-REVISIONIST (COLIN MARTIN & PETER PIERSON, 1999):
Underwater archaeological recovery of Spanish wrecks proves Spanish gun carriages were unsuited to rapid reloading at sea. The fireships at Calais broke the crescent, and Gravelines proved English culverin superiority, but unseasoned barrels and weather sealed Spain's doom.

Hinge Question for Class Discussion: *Was the defeat of the Spanish Armada primarily the result of English tactical and naval brilliance, or was Philip II's invasion plan doomed from the outset by fatal logistical flaws?*

COMPARATIVE POLICY SUCCESS EVALUATION • 1569–1588 — **CRITERIA-LED VERDICT**

1. COUNTER-ESPIONAGE: HIGH
Walsingham dismantled 4 major assassination plots; cryptographer Phelippes secured legal proof to execute Mary QoS without civil war.

2. DUTCH CAMPAIGN: LOW-MOD
Leicester's insubordination, desertions, and supply failures damaged trust; but tied down Parma's tercios and prevented Dutch collapse.

3. NAVAL DEFENCE: HIGH
Cadiz raid delayed invasion; race-built galleons, fireships at Calais, and culverin gunnery prevented Parma junction and routed Armada.

4. IMPERIAL FINANCE: LOW
War in Netherlands and naval mobilization drained Crown reserves, forcing sale of £120,000 Crown lands and renewed reliance on Parliament.

SYNOPTIC VERDICT • THE ESCALATION TO TOTAL WAR AND ARMADA TRIUMPH

Between 1569 and 1588, England was propelled from precarious cold war into total military conflict. While Elizabeth sought for two decades to preserve peace through strategic ambiguity, commercial piracy, and covert Dutch loans, the convergence of papal militancy, Catholic assassination plots around Mary Stuart, and Spain's annexation of Portugal made open war unavoidable. The execution of Mary in 1587 removed the final diplomatic restraint upon Philip II, culminating in the 1588 Armada. England's triumph was neither an accident nor merely a weather miracle: it was the direct product of Walsingham's ruthless intelligence network, Drake's pre-emptive strikes at Cadiz, Hawkins' revolutionary race-built galleons, and superior English standoff gunnery that prevented Parma's veteran army from ever crossing the Channel.

EXAM MASTERCLASS EDEXCEL PAPER 2 OPTION B4 • 1HI0/B4

Edexcel Paper 2: Examination Strategy & Exemplar Model Answers

Official Exam Blueprint: Deconstructing Question 1(a) & 1(b) Features [4m], Question 2 Causation [12m], and Question 3 Evaluative Essay [16m + 4 SPaG].

KEY CHRONOLOGY: EIGHT CAUSAL TURNING POINTS (1569–1588)

SPECIFICATION EVIDENCE RECALL

Nov 1569 • Northern Revolt
Earls of Northumberland & Westmorland seize Durham; Catholic feudal rebellion.

25 Feb 1570 • Regnans in Excelsis
Pius V excommunicates Elizabeth; frees subjects from loyalty; Catholicism = treason.

Sep 1580 • Golden Hind Returns
Drake completes circumnavigation with £400k treasure; knighted at Deptford (1581).

Dec 1584 • Treaty of Joinville
Philip II & French Catholic League unite; England left completely isolated.

10 Aug 1585 • Treaty of Nonsuch
England commits 7,400 troops to Netherlands under Leicester; open war with Spain.

8 Feb 1587 • Execution of Mary Stuart
Mary beheaded at Fotheringhay Castle after Babington cipher sting; removes Philip's French obstacle.

19 Apr 1587 • Cadiz Naval Raid
Drake destroys 30+ Spanish ships & 1,700 tons of barrel staves; delays Armada 12 months.

8 Aug 1588 • Battle of Gravelines
Calais fireships scatter crescent; culverins batter Armada; Protestant wind forces retreat.

QUESTION 1(A) & 1(B): DESCRIBE ONE FEATURE OF... [2 MARKS EACH • 4 MARKS TOTAL • 6 MINS]

Formula: 1 Mark Valid Feature + 1 Mark Supporting Detail (0 Explanation/Consequences)

Q1(a): Describe one feature of the Duke of Norfolk's plot (Ridolfi Plot) in 1571. [2 marks]
Model Answer: One feature was the planned invasion of England by a foreign Catholic army of **10,000 Spanish soldiers** led by the Duke of Alba. *[1 mark for valid feature]* The conspirators planned for these veteran troops from the Netherlands to land at Harwich, murder Queen Elizabeth, and marry Thomas Howard, Duke of Norfolk, to Mary, Queen of Scots. *[1 mark for supporting historical detail]*

Q1(b): Describe one feature of the fireship attack at Calais in 1588. [2 marks]
Model Answer: One feature was the English use of **eight burning ghost ships** packed with pitch, tar, and loaded cannons, drifted into the Spanish anchorage at midnight. *[1 mark for valid feature]* This ignited extreme panic among Spanish captains who feared exploding 'hellburners', causing them to cut their anchor cables and permanently break their defensive crescent formation. *[1 mark for supporting historical detail]*

Examiner Warning: Notice that Edexcel Paper 2 NEVER asks you to 'describe two features' in a single 4-mark question. It strictly divides them into Q1(a) [2m] and Q1(b) [2m]. Keep answers concise: state the feature, add one concrete factual statistic/date/name, and stop immediately. Never write explanations or consequences!

QUESTION 2: EXPLAIN WHY... [12 MARKS • 18 MINUTES]

Formula: 3 Full PEEL Paragraphs (2 Stimulus + 1 Own Knowledge) + Explicit Causal Connectives

Exam Prompt: Explain why war broke out between England and Spain in 1585. You may use: (1) Drake's privateering in the New World, (2) The Treaty of Nonsuch (1585). [12 marks]

PEEL Paragraph 1 (Commercial Piracy & Imperial Provocation): One major reason war erupted was English commercial piracy in the Spanish Americas, spearheaded by Sir Francis Drake. Spanish colonial law strictly forbade foreign merchants from trading in the New World, yet English 'sea dogs' repeatedly assaulted Spanish treasure ports. This culminated in Drake's 1577–1580 circumnavigation, during which he plundered £400,000 in silver and gold from the *Cacafuego*, doubling the Crown's annual income. *Consequently,* when Elizabeth publicly knighted Drake at Deptford in April 1581 rather than executing him as a pirate, she directly challenged Philip II's imperial prestige and economic solvency, convincing the Spanish monarch that commercial plundering could only be stopped through armed subjugation.

PEEL Paragraph 2 (Direct Military Intervention & Treaty of Nonsuch): Furthermore, the direct trigger for open warfare was Elizabeth signing the Treaty of Nonsuch in August 1585. Fearing that the fall of Antwerp to the Duke of Parma would leave the Low Countries in total Spanish control directly opposite London, Elizabeth abandoned twenty-seven years of strategic ambiguity. She agreed to finance and deploy 7,400 English soldiers under the Earl of Leicester and garrisoned the deep-water cautionary towns of Flushing and Brill. *As a direct result,* Philip II regarded this formal military deployment as an overt declaration of war, immediately impounding all English ships in Iberian ports and ordering the mobilization of the Armada.

PEEL Paragraph 3 (Own Knowledge: The Assassination of William & Joinville Isolation): Crucially, the geopolitical crisis in 1584 left England completely isolated and made war unavoidable. In July 1584, Dutch Protestant leader William the Silent was assassinated by a Catholic agent, proving that Protestant leaders could be eliminated. Simultaneously, Philip II signed the secret Treaty of Joinville with the French Catholic League, agreeing to fund the Duke of Guise to keep the Protestant Henry of Navarre off the French throne. *Therefore,* England was confronted by a united Franco-Spanish Catholic bloc; with France neutralized, Philip had a completely free hand to conquer England, compelling Elizabeth to strike first before Dutch resistance collapsed entirely.

Examiner Causation Strategy (Level 4): Contrast the foundational commercial rivalry (root cause) with the Treaty of Nonsuch and the assassination of William the Silent (immediate triggers). Candidates must explicitly link causes together. **12/12 CRITERIA**

QUESTION 3: EVALUATIVE ESSAY [16 MARKS + 4 SPAG • 25 MINUTES]

Level 4 Standard: 3 Balanced Factors + Criteria-Led Sustained Judgement

Exam Prompt: "The English use of fireships at Calais was the main reason for the defeat of the Spanish Armada in 1588." How far do you agree? Explain your answer. You may use: (1) Fireships at Calais, (2) English naval gunnery and ship design. [16 marks + 4 SPaG]

FACTOR 1: CALAIS FIRESHIPS (AGREE)
Midnight attack on 7 August broke the impenetrable crescent formation; Spanish captains cut anchor cables in panic, preventing re-anchoring and leaving ships scattered for Gravelines.

FACTOR 2: ENGLISH GUNNERY & DESIGN (COUNTER)
Hawkins' race-built galleons were faster and lower; long-range culverins on 4-wheeled truck carriages allowed rapid reloading, battering Spanish hulls while avoiding boarding melee.

FACTOR 3: SPANISH LOGISTICAL FLAWS & WIND (COUNTER)
No deep-water port to join Parma; Dutch flyboat blockade; unseasoned barrel staves rotting food/water; violent Atlantic gale blew scattered fleet onto Irish rocks.

EXEMPLAR LEVEL 4 CONCLUSION (CRITERIA-LED SUSTAINED JUDGEMENT):
"In conclusion, while the fireships at Calais provided the decisive tactical turning point, fatal structural and logistical flaws in Philip II's invasion plan were the ultimate cause of the Armada's defeat. When assessing causality by the criterion of foundational necessity, the fireships were only effective because the Armada was forced to anchor in an exposed roadstead off Calais due to the absence of a deep-water port in Flanders. Medina Sidonia could never successfully embark Parma's 27,000 soldiers while Dutch Protestant flyboats maintained an unshakeable shallow-water blockade. Furthermore, superior English naval design—Hawkins' nimble race-built galleons and fast-reloading culverin cannons—had already neutralized Spanish boarding tactics throughout the Channel voyage. The fireships shattered the crescent formation and Gravelines proved English artillery superiority, but the campaign was structurally doomed before departure by Drake's destruction of barrel staves at Cadiz and Philip's impossible coordination demands. The 'Protestant Wind' merely completed the destruction of an already defeated and disorganized fleet."

SPaG Masterclass (+4 Marks): Spell technical terms accurately (*recusancy, privateering, culverin, cautionary towns, tercios*). Use sophisticated causal links (*consequently, fundamentally, precipitated*). **4/4 SPaG TARGET**

EDEXCEL PAPER 2 EXAMINER MARKING BLUEPRINT & BAND DESCRIPTORS

OPTION B4 • 1HI0/B4

LEVEL 4 (13–16 MARKS)
Criteria-Led Evaluation: Analytical throughout; deploys line-by-line precise factual evidence; sustained judgement weighing root vs catalytic causes.

LEVEL 3 (9–12 MARKS)
Explanatory & Balanced: Explains both stimulus points plus own knowledge; links factors to prompt, but conclusion summarizes rather than synthesizes.

LEVEL 2 (5–8 MARKS)
Descriptive Narrative: Recounts narrative events without explicit analytical focus; unbalanced or lacks independent own knowledge beyond stimulus.

LEVEL 1 (1–4 MARKS)
Basic Statements: Generalized historical assertions with significant inaccuracies; offers simple assertions without supporting factual detail.

Exam Timing Allocation (50 Mins): Q1(a) 3 mins [2m] • Q1(b) 3 mins [2m] • Q2 Causation 18 mins [12m] • Q3 Essay 25 mins [16+4m] • Review 1 min **PEARSON EDEXCEL SPECIFICATION TARGET**

KEY TOPIC 2 CHRONOLOGICAL SEQUENCE • TURNING POINTS (1569–1588)

CAUSAL PROGRESSION

DATE	PIVOTAL EVENT	HISTORICAL SIGNIFICANCE & CAUSAL CONSEQUENCE
Nov 1569	Revolt of Northern Earls	Northumberland & Westmorland seize Durham; mass sung; 450 rebels executed after collapse.
25 Feb 1570	Papal Bull Regnans in Excelsis	Pius V excommunicates Elizabeth, releasing subjects from fealty and turning Catholicism into treason.
1571	The Ridolfi Plot	Conspiracy to land 10,000 Spanish troops and marry Mary QoS to Norfolk; leads to 1571 Treasons Act.
2 Jun 1572	Execution of Duke of Norfolk	England's premier Catholic peer beheaded on Tower Hill for complicity in the Ridolfi Plot.
1572	Drake Raids Nombre de Dios	Privateer raid in Panama captures £20,000 Spanish bullion, opening direct commercial warfare.
Nov 1576	The Spanish Fury at Antwerp	Mutinous Spanish troops massacre 7,000 citizens; 17 Dutch provinces unite in Pacification of Ghent.
Sep 1580	Golden Hind Circumnavigation	Drake returns with £400,000 Cacafuego treasure; Elizabeth knights Drake at Deptford on 4 Apr 1581.
1583	The Throckmorton Plot	French Catholic invasion unmasked by Walsingham; Mendoza expelled; 1584 Bond of Association drafted.
10 Jul 1584	William the Silent Assassinated	Dutch leader shot dead; Treaty of Joinville unites Spain and France; leaves England utterly isolated.
10 Aug 1585	Treaty of Nonsuch	England commits 7,400 troops under Leicester and occupies cautionary towns; open war begins.
Jul–Oct 1586	The Babington Plot Exposed	Phelippes deciphers beer-barrel letters; Mary's endorsement of regicide proves fatal under Bond.
8 Feb 1587	Execution of Mary, Queen of Scots	Beheaded at Fotheringhay Castle; eliminates Catholic claimant; triggers Philip's invasion crusade.
19 Apr 1587	Drake's Raid on Cadiz	'Singeing the King's Beard': 30+ ships and 1,700 tons of barrel staves burned; delays Armada 1 year.
7–8 Aug 1588	Fireships at Calais & Gravelines	Fireships scatter crescent formation; culverin broadsides rout fleet; gale forces catastrophic retreat.

KEY DISCIPLINARY TERMINOLOGY

- **Bond of Association (1584):** Legal pledge binding signatories to murder anyone plotting against the Queen or benefiting from regicide.
- **Privateering:** State-sanctioned piracy where armed merchant vessels operated under government letters of marque against Spanish shipping.
- **Cautionary Towns:** Strategic Dutch deep-water ports (Flushing and Brill) surrendered to English garrisons as surety for war loans.
- **Treaty of Joinville (1584):** Secret pact uniting Philip II and the French Catholic League, isolating England on the European stage.
- **Crescent Formation:** Spanish naval array stretching seven miles wide, shielding vulnerable supply hulks inside heavy outer galleons.
- **Culverin:** Long-range English naval cannon mounted on 4-wheel truck carriages, allowing fast reloading and standoff broadsides.
- **Fireships (Hellburners):** Eight burning ghost ships drifted into Calais harbour, forcing the Spanish to cut anchor cables in panic.
- **Protestant Wind:** Fierce south-westerly gale that blew the damaged Armada into the North Sea, wrecking ships on Irish rocks.

EDEXCEL PAPER 2 EXAM FRAMEWORK & MODELS

32 MARKS TOTAL • 50 MINS

Q1(a) & Q1(b): Describe ONE feature of... [2 + 2 = 4 Marks • 6 Mins]
Model: "Describe one feature of the fireship attack at Calais in 1588."
Formula: 1 mark valid feature + 1 mark supporting historical detail (0 explanation).

Q2: Explain why... [12 Marks • 18 Mins]
Model: "Explain why war broke out between England and Spain in 1585."
Formula: 3 PEEL paragraphs (2 stimulus + 1 own knowledge) linked with causal connectives.

Q3: Evaluative Essay [16 Marks + 4 SPaG • 25 Mins]
Model: "'Fireships at Calais were the main cause of Armada defeat.' How far do you agree?"
Formula: 3 balanced analytical paragraphs + criteria-led sustained conclusion.

ASSESSMENT OBJECTIVE 1 (AO1 • 50%):
Demonstrate knowledge and understanding of key features and characteristics of the period (precise dates, statutory acts, plot conspiracies, naval statistics).

ASSESSMENT OBJECTIVE 2 (AO2 • 50%):
Explain and analyse historical events using second-order concepts (cause, consequence, change, continuity, and reaching sustained historical judgements).

INTERACTIVE DIGITAL RETRIEVAL HUB **KEY TOPIC 2 KNOWLEDGE QUIZ & FLASHCARDS**

Scan the QR code with any smartphone or tablet camera to launch the interactive, self-marking retrieval bank for Key Topic 2. Test your rapid recall across Catholic Plots, Drake's Circumnavigation, the Treaty of Nonsuch, Cadiz Raid, and the 1588 Armada with instant model answers and scoring.

• 20 Specification Recall Questions • Instant Self-Marking & Explanations • Digital Leitner Flashcard Deck
